Yamaha Digital Piano CLP, CVP & CGP Series

Clavinova®

Real Grand Expression

Tone Touch Pedals
Clavinova’s expressive capabilities embody more than a century of piano craftsmanship skill and spirit.

Yamaha believes that the true expressive capability of a grand piano lies in its seamless integration of tone, touch and pedals. Focus on any one of those elements individually and that capability is lost. Clavinova integrates all of these elements into a single instrument capable of reproducing the exact performance the player intends to play.

Real Grand Expression (RGE) was developed by Yamaha using the skills and spirit of building acoustic pianos for more than a century. It represents thorough attention to design and includes many features that increase the joy of playing piano.

We invite you to sit down at a Clavinova and experience it for yourself. You’ll feel the true joy of playing a piano through your fingertips and your ears.
Yamaha's piano-making skills are recognized worldwide.

Yamaha’s concert grand piano, the CFX, was selected and played by the 2010 winner of the International Frederick Chopin Piano Competition, one of the world’s top piano competitions. Its fame validates the high standard of quality developed by Yamaha over its 100-year history of piano manufacturing. The skill of Yamaha craftsmen is the origin of Clavinova’s expressive capabilities.
**Real Grand Expression**

Tone, touch, pedals—perfectly integrated to give you the sensation of playing a grand piano.

Real Grand Expression. This phrase defines the expressive capability of Clavinova. It is not only the full realization of the tone, the touch and the pedals, but the application of technologies nurtured by crafting acoustic pianos to perfectly integrate these three elements into a single piano. This piano produces that exact sound you want through the touch of the keys and the feel of the pedals. As you play, you will truly feel as though you are playing a grand piano.

---

**The sound is heard just as it was played.**

Yamaha's RGE Sound Engine provides playing response and expressive capability rivaling those of a grand piano.

**Piano Voices embody the careful attention only a piano manufacturer can give.**

The grand piano Voices of a Clavinova were obtained by recording the sounds of a Yamaha concert grand piano that led to the creation of the CFX, the piano selected for a performance by the 2010 winner of the famed International Frederick Chopin Piano Competition. A single piano best suited for recording was selected and then tuned to the finest possible condition by a veteran piano tuner. All the sounds were recorded resulting in a tone that displays not only the beauty of each note, but the harmonized sound of a single piano.

**Dynamic change of tone is dependent on touch.**

An acoustic piano is a musical instrument whose sounds linger for a long period. The strength of touch varies not only the volume, but also the tone from bright to dark sounds, creating rich expressiveness. Clavinova produces deep resonances by using piano sounds that have been accurately sampling for their entire length. Proprietary technology creates smooth and dynamic changes according to the strength of the touch. Additionally, to achieve a performance feel rivaling that of a grand piano, the touch was carefully refined by many pianists who played it and gave their feedback for Yamaha's research and development.

---

**The RGE Sound Engine delivers the ultimate expressive capability for the CLP Series.**

The new CLP Series uses the RGE (Real Grand Expression) Sound Engine, the next-generation piano sound source. It improves upon the Pure CF Sound Engine, which earned high praise in the CVP Series, and lets you enjoy the playing response and expressive capability of a concert grand piano. It features a new Smooth Release function which can express tone with great clarity, and clearly enunciate staccato notes with the sound of lingering resonance heard when gently lifting your fingers from the keys. It succeeds in capturing the essence of a piano performance to create grand piano-like, richly expressive experiences.

**Subtly reproduces resonances with the depth you hear from an acoustic piano.**

Clavinova subtly reproduces even the unique resonances of an acoustic piano. It features String Resonance* that expresses the mellow sounds of the other strings resonating, and Key-Off samples* that actually deliver the delicate change in sound the instant the damper touches the string, just before you raise your finger from the key. The addition of these sounds results in tonal resonances that are not only beautiful, but also deep and rich.

256-note polyphony* lets you play without notes dropping-out, especially in dense passages of music.

When you play fast phrases or superimpose chords while pressing the damper pedal, you want to be able to perform without notes dropping out. The Clavinova provides 256-note polyphony so you
can enjoy complex works such as those by Liszt or Ravel, which feature numerous pedal presses, with no limitations. As your playing improves over the years, your Clavinova will continue to let you make the most of your abilities.

The Tri-Amp System* reproduces all sound ranges more beautifully and clearly.

A good piano lets you hear every sound within the piece clearly and beautifully. Clavinova’s Tri-Amp System makes this possible by using dedicated amplifiers to drive three separate speaker systems for the three independent frequency ranges. This method can be appreciated by audiophiles and piano purists alike as it ensures that you will hear all the subtle nuances of your performance.

The GP Soundboard Speaker* produces broad resonance with the depth of a grand piano.

When you play a grand piano, you are immersed in the sound because of the broad and deep resonances the soundboard creates. These effects are reproduced by the GP Soundboard Speaker. Because the sound emanates from the back of the piano, you can enjoy three-dimensional sound reminiscent of a grand piano. * CLP-480.

The acoustic system produces acoustic piano sound as if the instrument itself is resonating.

Because Yamaha places so much importance on the joy of playing, the speakers, amps and other acoustic systems have been optimized so the player hears nothing but stunning sound during a performance. These musical instrument-like resonances give the impression that the Clavinova is more acoustic than it is digital.

The GH3 (Graded Hammer 3) keyboard* faithfully reproduces the touch of a grand piano.

The touch of the Clavinova keyboard has been praised by pianists for a performance feel that makes you forget it’s a digital piano. The secret behind this superior touch is the same hammering system and spring-less mechanism as a grand piano. Depending on the weight of the hammer, the force of your touch and the natural key return when you release it, the Clavinova faithfully reproduces the keyboard touch of an acoustic piano from the heavy feel in the lower range to the light feel in the higher range. Also important is Yamaha’s unique three-sensor system, which accurately senses and interprets the behavior of the keyboard, just like a grand piano.

When playing continuously or with a light trill, techniques used in many pieces such as Für Elise, you can play with a bright, vivid feel.

Touch

Real Grand Expression

The Clavinova Keyboard Structure (GH/GH3/NW keyboard)

When key is pressed

The hammer rises, providing a piano-like touch.

When key is released

The weight of the hammer causes the key to return.

Each key has three sensors.

Three sensors accurately sense the motion of keys

(GH3/NW keyboard)

Experience real piano touch with Yamaha’s Natural Wood keyboard.

The Clavinova NW (Natural Wood) keyboard* could only be made by Yamaha, with woodworking techniques perfected from over a century of building fine acoustic pianos. Like a grand piano, the keys are made of solid wood that has undergone the long drying process required for use in a musical instrument. By selecting only the highest quality sections of each piece of wood, keys that are more resistant to warping and deforming than those of laminated wooden keyboards are created. The keys have three sensors, like the GH3 keyboard, that amplify sensitivity to the pianist playing them. Combined with the solid texture of wood, this provides an outstanding playing experience and performance.

Synthetic ivory keytops* remain tactile during long performances.

Pianists enjoy a touch that clings firmly to their fingers, just like the ivory keyboards historically used in top-class pianos. Synthetic ivory keytops feature a soft, slightly porous surface that gives keys added grip and natural friction for improved ease in playing, especially during long performances or practice sessions. The keys’ smooth, refined texture imparts a feeling of luxury and is easy to clean.

* CLP-400 / 440 / 460 / 460GP, CVP-503 / 505 / 509 / 609GP, CGP-1000.

* CLP-480, CVP-509.

* CLP-470 / 480 / 540, CVP-509 / 409GP, CGP-1000.

Each key in the Clavinova keyboard has a unique weight. On a traditional acoustic piano, the strings are short and narrow in the treble section and get progressively thicker and longer in the bass section. To produce an even sound, the hammers hitting the keys become larger from low to high. Thanks to the **88-key Linear Graded Hammers**, this is the first digital piano to precisely recreate the keyboard touch of a grand piano where the weight, touch and return of every key is different. Since the experience is extremely close to that of a grand piano, you can achieve better playing technique.

The keyboard must respond perfectly to the touch of your fingers so the notes sound just as you intend. Because the keyboard plays such a critical role, it must allow you to play smoothly and maintain good touch for long periods of time. That's why all 88 keys are equipped with **Keyboard Stabilizers**. This not only lets you play with a natural touch, it greatly improves the stability and durability of the keys.

**Keyboards have a long distance to the fulcrum offering easy-to-play touch, even to the base of each key.**

The keys provide a pleasing touch down to the base, because the distance from the tip of the key to the fulcrum is extremely long. When playing a piece that uses many black keys, even when you press a white key near its base, the key sinks softly, maintaining the delicate nuances of soft and hard key strokes.

---

**Pedals**

**The GP Response Damper Pedal** provides an operating feel just like that of a grand piano.

The damper pedal is an important piano-playing element because it continuously varies the tone as you press it down. The Clavinova behaves the same way as an acoustic piano by constantly detecting the amount of pedal press or return and finely adjusting the amount of note elongation and reverberation. Additionally, the **GP Response Damper Pedal** reproduces the typical grand piano feeling, for example less resistance when starting to press and a heavy feeling when the pedal begins to take effect. As a result, players achieve greater control when operating the damper pedal.

---

**Stereo Sustain samples** provide the mellow reverberations created as you depress the damper pedal. **Damper Resonance** similarly produces broad and deep resonances when the pedal is used. The result is realistic sound, just as if you were playing an acoustic piano. You will even hear the subtle changes that occur according to whether the player begins to press the pedal before or after striking a key. You can enjoy playing impressionistic pieces, such as those by Debussy or Ravel, where half-pedal expression is important.

---

**Using the pedals provides realistic resonances that accurately convey all sound changes.**

---

**Differences between ease of playing according to distance to the fulcrum**

Key tip far from the fulcrum (Clavinova) Key tip close to the fulcrum

---

Clavinova key tips are far from the fulcrum, so the keys sink smoothly when played near the base.
Design & Features

Thoughtful attention to design and features offers an unmatched playing experience.

Design

Design captures the essential beauty of a piano. Color variations are available.

Clavinovas are designed to offer the appearance and presence of an acoustic piano. The luxurious polished finish offers a piano-like texture while other color variations complement any room’s decor. The CLP Series includes slimline models that fit neatly almost anywhere, and a grand piano-like model with its graceful silhouette.

Panel Reveal Key Cover* hides the operating panel for a more natural acoustic piano look.

The Panel Reveal Key Cover lets you perform with all signs of technology on the control panel discreetly hidden. This adds to the traditional piano-like cabinet design of the CLP-400 Series.

* CLP-430 / 440 / 470 / 480 / 465GP.

Features

Intelligent Acoustic Control* provides a full, balanced tone with rich lows and clear highs even at low volumes.

Volume adjustment is convenient for playing at home, where sometimes others may prefer you play softly. You’ve probably experienced the fact that when the volume is low, it is difficult to hear treble and bass. On a Clavinova, however, the Intelligent Acoustic Control (IAC) function automatically adjusts the sound, so you enjoy proper sound balance even at low volumes. Additionally, the volume dial automatically makes fine adjustments to the overall tone of the speaker system (EQ) at low volume. This ability to adjust volume without losing the rich and balanced sound is an exclusive Yamaha benefit, ensuring you always play with the utmost tone quality.

* All CLP models.

Benefits of the IAC function

As the volume decreases, the difficult to hear bass and treble ranges are automatically adjusted. At normal volume levels, IAC is not applied.

Setting the volume control

Because the Clavinova provides a wide adjustment range for low volume sounds, delicate low volume adjustment is possible. This is useful during normal play and when using headphones.

A full selection of basic functions unique to a digital piano such as sound volume adjustment and metronome are provided. In addition to being compact and not requiring tuning, Clavinova models provide volume adjustment and two headphone jacks so you can listen to your children practice or enjoy playing duets in private. A metronome and other features help you improve your piano skills.

Two recording functions can be used selectively according to your purpose.

Recording on a Clavinova is simple and speedy. Recording is a useful way to evaluate your performances. You can record with the touch of a button and even do two-track recording, which lets you record the parts for your two hands separately, then play them simultaneously. You can also store performances on a USB memory device.*

* Storage format is SMF. To play the files on a computer, compatible software (such as QuickTime or Windows Media Player) and sound source are required.

Record performances onto USB flash memory so that you can share your music.

By using the USB Audio Recorder,*1 you can record your own performances on to USB flash memory as an audio file.*2 Because it can be played back without a Clavinova, you can store it on a PC to track and compare your progress or put the recordings on a CD so your family and friends can enjoy them. You can also listen to the files on-the-go by loading them on to portable media players.*1 Excluding the CVP-501. *2 Uses WAV storage format.

Wide selection of realistic musical instrument Voices adds variety to your performances.

Multiple piano Voices are built in so you can select the kind of piano that suits the genre you want to play without having to adjust the sound. The CLP Series digital piano Voices include many realistic musical instrument Voices, such as those handed down directly from Yamaha’s CP1 Stage Piano. The CVP and CGP Series have additional Voices that let you express sounds unique to various musical instruments like the guitar fret noise or the breathing of a saxophone player.*

USB ports allow easy data storage and transfer.

Clavinovas have a USB TO DEVICE port for plugging-in USB memory devices and a USB TO HOST port for connecting to a computer via a single USB cable. They provide a way to conveniently store performance data, and transfer other data between your Clavinova and computer or other Clavinovas.

Online service lets you access new Clavinova fun at any time.

A wide selection of songs, scores and other great musical content is available at the Yamaha MusicSoft.com website. With the CVP and CGP Series, you can access the internet* directly from your Clavinova.

* For details about the internet service, refer to pages 16 and 17.

Environmentally friendly design reduces power consumption by as much as 50%.*

The new Clavinovas reduce power consumption as much as 50% from previous models by using high efficiency amplifiers. Not only do these amplifiers save energy, they also improve sound quality. The more you play, the more you will appreciate this energy-saving performance. * CLP-310.
Presenting two exquisitely crafted Clavinova Series. A wide choice of models guaranteed to satisfy your desire to play the piano.

**CLP Series**

Clavinova’s refined tone, touch and pedals exhibit the essential expressive capabilities of a piano.

- **Point 1.** Providing a piano-like playing feel via the RGE Sound Engine.
- **Point 2.** A performance piano developed with the player in mind.
- **Point 3.** Various features help you improve your playing.

**CVP & CGP Series**

Offering genuine touch and tone with a wide variety of features, Clavinova offers new ways to enjoy piano performance.

- **Point 1.** Be the band leader in hundreds of musical ensembles.
- **Point 2.** Play right away, even if it’s your first time!
- **Point 3.** More features increase your enjoyment of music.
Yamaha Digital Piano

Clavinova.

Yamaha Digital Piano

Features Upgraded from CLP-430
- Synthetic ivory keytops provide a comfortable feel.
- Subtle sound changes are expressed, like when the finger is lifted from a key.
- Clear sound outputs from a 2-way speaker.

CLP-440

Features Upgraded from CLP-440
- Real wood keyboard provides a satisfying playing touch.
- Each key offers a subtly different return feel.
- Pedals provide the same feel as those of a grand piano.

CLP-470

Features Upgraded from CLP-470
- Three amps produce all sound ranges clearly.
- Speaker delivers sound with a real feeling of depth.
- Song data lets you play with accompaniment.

CLP-480

Cabinet Upgraded from CLP-440 to Slim Type
- Slim design boasts a depth of only 43cm.

CLP-S406

Cabinet Upgraded from CLP-470 to Slim Type
- Slim design boasts a depth of only 43cm.

CLP-S408

CVP-505

Features Upgraded from the CVP-503
- Voices that let you express the unique sounds of musical instruments.
- Features a large, full-color LCD display.
- Offers an elegant design with a beautiful finish, even in the back.

CVP-509

Features Upgraded from the CVP-509PE
- Features clear and natural musical instrument Voices.
- Real wood keyboard provides a satisfying playing touch.
- Three amps produce all sound ranges clearly.

CVP-409GP

CVP-409GP Main Features
- Features elegant grand piano style.
- Real wood keyboard provides a satisfying playing touch.
- Offers a deep, wide and fully enveloping tonal response.

CGP-1000

CGP-1000 Main Features
- Features impressive grand piano appearance.
- Fallboard covers the operation panel.
- Actual piano soundboard provides deep, resonant sound.

Clavinova’s refined tone, touch and pedals exhibit the essential expressive capabilities of a piano.
The CLP Series was created expressly to achieve a playing sensation you would get when playing a grand piano. Its RGE Sound Engine recorded all sounds from one carefully selected piano and refines them with careful attention to playing response and expressive capability. Additionally, keyboard touch is precisely calibrated and pedals are linked directly to changes of pressure and resonance. Integrating all these elements that make up a piano result in a superb playing experience.

Expressive capability is recognized by famed music schools worldwide.

Some of the institutions that use Clavinova

UK: Royal Academy of Music / The Guildhall School of Music and Drama / The Royal Northern College of Music / Birmingham Conservatoire / Chesterhams School of Music / Manchester / USA: Oberlin Conservatory / Eastman School of Music / University of Southern California / University of Arizona / Boston University / University of Alaska / Georgia State University / Canada: Royal Conservatory of Music / Schalich School of Music at McGill University / Montreal Faculty of Music / University of Toronto School of Creative and Performing Arts / Humber College / Toronto Department of Music / Grant McEwan College / Edmonton Department of Music / University of Calgary

![Royal Academy of Music](image)

The Royal Academy of Music and more than 700 other music institutions use Clavinova. The reasons why they choose Clavinova are, above all, the tone and touch. Clavinova models are excellent for students aiming to become top pianists, who must be able to practice without losing the sensation of a grand piano. Their natural resonances, performance feel and expressive capability are recognized by professionals around the world.

### Point 1.
Providing a piano-like playing feel via the RGE Sound Engine.

Expressive capability is recognized by famed music schools worldwide.

### Point 2.
A performance piano developed with the player in mind.

#### The goal is a sound that is pleasant to play.

Yamaha does everything possible to create the optimum sound at the playing position. This requires precise attention to detail, extending from the selection of the piano to be sampled to the tuning of the recorded sound and the position of the speakers.

#### Playing loudly is not always preferred.

For those times when family members are studying, sleeping and so on, the Clavinova not only offers headphone jacks, but also an Intelligent Acoustic Control (IAC) function that lets you play with proper sound balance at low volumes.

### Point 3.
Various features help you improve your playing.

#### Master popular songs with lesson features.

Stored inside your Clavinova are 50 well-known pieces of standard piano repertoire, including some often performed at recitals. You can listen to them as background music or take advantage of this collection of piano music to practice using lesson features.

#### Practice using the recording function.

There are two recording methods: Recording to Internal Flash Memory records directly to the Clavinova and USB Audio Recording records to a USB memory device where the file can be transferred to a PC, then used in various ways.

- When you want to play back the recording immediately: Recording to Internal Flash Memory
  - Check your entire performance or skip to difficult phrases.
  - Record one hand at a time, then play them back together.

- When you want to save a performance: USB Audio Recording Memory
  - Store your own performances on a PC.
  - Email it to a friend.
  - Listen to it on a portable media player.
  - Burn your recordings to an audio CD.

#### Practice each hand independently

You can practice each hand separately while the Clavinova accompanies you to build proficiency.

#### Play at a reduced tempo

You can easily vary the tempo while maintaining the same pitch. Practicing difficult passages at a reduced tempo is a great way to build confidence.

#### Play a phrase repeatedly

You can play a difficult phrase over and over with the assistance of the built-in recordings. This is a great help in mastering the entire piece.

All the capabilities you want in your first piano, like satisfying touch and tone, will make playing enjoyable.
This model features the RGE Sound Engine, a piano source with rich, expressive capability. The GH3 keyboard lets you employ the unique performance techniques used to play grand pianos. The tone and touch provide the same experience as an acoustic piano. It is also equipped with features to improve how you practice at home, including an Intelligent Acoustic Control (IAC) function for proper tonal balance when playing at low volume and functions for recording data you can hear when using a computer or portable media player.* The CLP-430 was designed with careful attention to every detail, such as the Panel Reveal Key Cover, which covers the operating panel for a traditional acoustic piano-like look. *WAV mode.
Synthetic ivory keytops and RGE Sound Engine with Key-Off, String Resonance and Stereo Sustain samples provide expansive grand piano touch and tone.
On the **GH3 (Graded Hammer 3)** keyboard with superior performance properties, **synthetic ivory keytops** provide pleasant touch even during long performances. The CLP-440 offers the touch of higher-class models. In addition to the **RGE Sound Engine**, a piano sound source reflecting Yamaha's precise attention to detail, it even achieves the resonance of strings, subtle changes of sound when your fingers rise from the keys and mellow reverberations the instant the damper pedal is pressed. Grand piano-like, rich, expressive sound will vividly resonate in perfect harmony with your performance. There are also multiple color variations you can choose to suit your taste and the decor of your room.
Experience the performance sensation of a grand piano from the response of the 88 uniquely weighted wooden keys to the action of the pedals.

**Slim Cabinet**
The CLP Slimline Series is only 43cm deep and imparts a luxurious piano-like presence. The CLP-S406 and S408 uncompromisingly achieves both space-saving convenience and the expressive capabilities only possible from a Clavinova. Their simple design with a straight line silhouette presents a true piano appearance and achieves superior playing properties, thanks to the opening-closing action of their specially-made keyboard cover and many other innovations incorporated into their slim bodies.

**CLP-S406B**

Dynamic sound resonance and diffusion, the texture of ivory-finished keys and uncompromising tone and touch are yours in an appealingly slim piano.

The GH3 keyboard is finished with synthetic ivory keytops for comfortable playing. With its slim and stylish body, this piano will give your room a feeling of luxury. It reproduces the detailed resonances of an acoustic piano, including String Resonances and the instantaneous sound change as you lift your finger from a key. This is a piano that is fun and easy to play.

**CLP-S408PE**

The touch of a wooden keyboard, with 88 uniquely weighted keys, and many other grand piano features are brilliantly brought together in a slim body.

The NW (Natural Wood) keyboard with synthetic ivory keytops, 88-key Linear Graded Hammers, a GP Response Damper Pedal and other products of the skills and attention to detail of a piano craftsman are concentrated in this slim design. With performance properties close to that of a grand piano, its piano sound source is, of course, the RGE Sound Engine. It reverberates natural sound with a depth you wouldn’t expect out of such a slim body.

- Dual headphone jacks
- 40 W x 2 amplifier
- (16 cm + 5 cm) x 2 speaker system (Speaker box) [(6 5/16" + 1 15/16") x 2 speaker system (Speaker box)]
- 50 built-in demonstration piano songs with sheet music

Main features are the same as the CLP-440, except for Panel Reveal Key Cover.

---

**Main Features**

- At only 43cm deep, the design is slim and has good performance properties
- GH3 keyboard with synthetic ivory keytops
- Keys provide a superb touch for enhanced playability
- Reproduces sound and string resonance changes when your finger leaves the key

**Other Features**

- USB Audio Recorder (Playback: WAV / Recording: WAV)

---

Main features are the same as the CLP-440, except for Panel Reveal Key Cover.
Enjoy the luxurious look of a grand piano cabinet with a polished ebony finish, as well as grand piano touch and tone.

465GP

CLP-465GP
Polished Ebony

Design embodies the style of a grand piano

Mini Grand Cabinet

New generation piano sound source provides outstanding playing response and expressive capability

RGE Sound Engine

The keyboard provides true grand piano touch

GH3 keyboard
CLP-465GP
Polished Ebony

This Clavinova reproduces the authentic silhouette of a grand piano, including the elegant curves and an impressively large lid. It also gives you the performance feel of a grand piano, thanks to the synergistic effects of the RGE Sound Engine, GH3 keyboard and other basic functions. Its acoustic system includes two-way speakers to achieve clear and vivid reverberations. A solid piano sound is produced using this large body to produce rich volume.

Elegant style brings you closer to the joy of owning a grand piano.

This piano was designed with scrupulous attention to its gorgeous grand piano-like exterior, including all details such as the large cover that can be opened and closed, the pedals and the legs. Another attractive feature is its lustrous finish, which produces deep brilliance. This luxurious texture is a result of using Yamaha’s exclusive coating technology nurtured through a long history of building acoustic pianos. It is a Clavinova with beautiful presence, just as if you had a grand piano in your room.

Main Features

- 88-key GH3 (Graded Hammer 3) keyboard
- RGE (Real Grand Expression) Sound Engine
- Smooth Release
- Damper Resonance
- 128-note polyphony
- 14 Voices
- Intelligent Acoustic Control (IAC)
- USB Audio Recorder (Playback: WAV / Recording: WAV)
- Panel Reveal Key Cover

Other Features

- 7-segment LED
- Digital Effects (Reverb / Effect / Brilliance)
- 2-track recording
- Internal Flash ROM for song memory (about 1.5 MB)
- USB TO HOST and USB TO DEVICE
- Dual headphone jacks
- 40 W x 2 amplifier
- (16 cm + 5 cm) x 2 speaker system (Speaker box)
- Music clips
- 50 built-in demonstration piano songs with sheet music
Offering genuine touch and tone with a wide variety of features, Clavinova offers new ways to enjoy piano performance.
Point 1. Be the band leader in hundreds of musical ensembles.

In addition to playing a piece of music, the CVP and CGP Series allows you to play along with a variety of instruments. The built-in Styles give you access to hundreds of bands and musical ensembles that are always ready to perform with you in a variety of musical genres. It's as easy as holding a playing a chord to experience instruments like guitar, bass, drums, string orchestras or even classical choirs accompanying you. Hundreds of built-in bands and ensembles from Swing and Jazz, Pop and Rock, Movie and Show and more, are always available to follow your lead.

**Enjoyment method**

**Automatic Accompaniment (Style)**

- Add automatic accompaniments to your normal repertoire, dramatically changing the musical mood.
- To create a magnificent accompaniment, a mother can accompany her child's performance by playing chords with her left hand.

Point 2. Play right away, even if it's your first time!

“I've always wanted to play my favorite song on the piano but I've never taken piano lessons!” Using the CVP and CGP’s Guide feature, anyone can learn how to play by following the guide lamps. Guide lamps let you see exactly which key to play, at your own pace, while the rest of the band waits for you.

**Enjoyment method**

**Guide feature**

- When learning a new song, you can check how to use your fingers while looking at the musical score.
- You can play one phrase repeatedly, letting you concentrate on difficult parts as you practice.

Point 3. More features increase your enjoyment of music.

CVP and CGP Clavinovas contains a rich selection of musical instrument Voices you can play like string orchestras, woodwinds, guitar, brass, percussion and hundreds more. Share performances with friends and family by using the built-in audio recorder. Select new songs to learn and play from a vast musical library by directly accessing the internet from your Clavinova.

**Enjoyment method**

**Various Functions**

- Each Voice lets you audition demonstration performances.
- You can find a Voice perfect for the image of each piece you want to play.
- Record various sounds as audio data.* You can record your own performance, and also the automatic accompaniment plus the sounds of a mike or guitar connected to your Clavinova.

* Excluding the CVP-501. Uses WAV storage format.

See pages 26-27 for CVP and CGP Series features.
Play more than just a piano with the CVP and CGP Series.

**Exciting ensembles in only 3 steps.**

**A Style Control**

**STEP 1** Select an accompaniment Style from the many available genres.

Rock, Latin and many other accompaniment Styles are provided. Try playing the same song with a different Style for a dramatically different musical result.

**STEP 2** Have the ensemble follow your playing.

Play the chord changes with your left hand, the melody in the right and the Style will follow your harmony.

*It doesn’t matter if you are not accustomed to chords. This feature lets you play immediately.*

- Multiple chord playing modes are provided. You can select the mode that best suits you: a mode that can be pressed simply by one finger, or even a mode that lets the Clavinova automatically detect chords from a normal two-handed, full keyboard performance.
- You can learn the types of chords and how to play them using the built-in Chord Tutor.

**STEP 3** Add arrangement changes at any time with a single touch.

By simply pressing a Style Control button on the panel, you can add an introduction or ending, or create variety and changes to match the energy of the song.

**B Music Finder**

**Music Finder automatically sets recommended settings if you are unsure about accompaniment selection.**

When you are unsure about selecting the accompaniment Style and Voice suited to the song you want to play, try the built-in Music Finder. Press a button, select a song title and the most suitable Style, Voice and tempo are automatically recalled.

**Music Finder+ teaches you how to play, including chord progressions.**

By connecting your CVP or CGP Clavinova to the internet, you can hear a sample accompaniment for the song you selected with Music Finder or practice using the Guide feature. You can also search for the latest song files or accompaniment Styles and Voices by the song title, then add them to your Clavinova.

**Simple ensembles using stored songs**

Stored songs with magnificent accompaniments can be enjoyed with ease as ensembles. Simply turn off the melody part of the song you want to play and play the melody yourself. A wide variety of musical instrument accompaniments will enliven your performance.
1,291 Voices*1 add tremendous variety to your playing.

With Super Articulation Voice*2 technology, you can reproduce unique nuances specific to different musical instruments. Simply play the keyboard and experience the sound of a genuine guitar or saxophone. The CVP-509 features Super Articulation 2 Voices, which add another dimension of realism.

Expand song and Style content by connecting to the internet.

You can access a special Yamaha site on the internet directly from your Clavinova to expand the onboard Style and song content.

For details of the internet service, see pages 36 and 37.

Karaoke night!*1

Turn your Clavinova into a karaoke machine by plugging in a microphone, add a standard MIDI file with lyrics and connect the video out of the Clavinova to your television.*2 The Clavinova can even provide the background vocals via its built-in Vocal Harmony feature.

Partial list of stored songs

- The Entertainer
- Greensleeves
- The Last Rose Of Summer
- Loch Lomond
- Scarborough Fair
- Deck The Hall
- We Wish You A Merry Christmas
- Three Blind Mice
- Twinkle Twinkle Little Star
- Ave Maria (Gounod)
- Ave Maria (Schubert)
- Petit Suite, 1. En Bateau
- Canon (Pachelbel)
- Dolly, Suite a quatre mains Op.56, 1. Berceuse
- Eine Kleine Nachtmusik
- For Elise
- Jesu, Joy Of Man’s Desiring
- Minuet In G (Bach)
- Piano Concerto No.21 2nd Mov

- When The Saints Go Marching In
- Amazing Grace
- Beautiful Dreamer
- Grandfather’s Clock
- On Top Of Old Smokey
- Jingle Bells
- Silent Night

Play right away, even if it’s your first time!

On-screen score display helps you know what to play and when.

A ball bounces along the score displayed on the screen in time with the accompaniment. Never lose your place by following the bouncing ball; it will even change pages for you so you can keep your hands on the keyboard.

Famous songs to learn by ear are available for you to try playing.

Connecting to the internet gives you more than 3,500 songs you can practice in addition to the 120 songs* stored in your Clavinova. New songs are continually added, so you can always find the songs that you want to play.  * CVP-501 has 61 songs.

More features increase your enjoyment of music.

Guide Lamps show you the next note to play so even if you can’t read music, you can play by following the lights. When you use guide lamps, the rest of the music waits for you to play the correct note.

Play by watching the guide lamps, even if you cannot read music.

You can access a special Yamaha site on the internet directly from your Clavinova to expand the onboard Style and song content.

For details of the internet service, see pages 36 and 37.

Note: Images are from CVP-509. Content and displays are subject to change without notice.
Thanks to the Guide feature that teaches you how to play, you can start practicing your favorite songs right away, even if this is your first piano. The Pure CF Sound Engine provides beautiful piano tone along with excellent touch via the Graded Hammer keyboard. The CVP-501 also includes a wide range of Styles so you can give ensemble performances with a variety of instruments. You can play any song with a completely different feeling simply by changing the Style. Also, you can connect to the internet and access a vast range of song content.

Use the Guide feature to learn how to play or lead your own musical group with the built-in Styles.
The CVP-503 uses the Pure CF Sound Engine, a natural piano sound source with excellent touch response. Its GH3 keyboard can reproduce the unique way that a grand piano is played. The keys are finished in synthetic ivory to prevent your fingers from slipping. In addition to its advanced piano performance, it has great features like karaoke with harmony and chorus parts, and a built-in USB Audio Recorder* to record yourself playing, singing or both.

* Data format that can be listened to on a computer or audio player (.WAV).

---

### Main Features
- 88-key GH3 (Graded Hammer 3) keyboard with synthetic ivory keytops
- Pure CF Sound Engine
- Key-Off samples
- Stereo Sustain samples
- 128-note polyphony
- 272 Accompaniment Styles
- Music Finder

### Other Features
- 320 x 240 dots QVGA monochrome 5.7 inch LCD
- 6 Languages for display (English, Japanese, German, French, Spanish, Italian)
- USB TO HOST and USB TO DEVICE (1)
- Dual headphone jacks, Mic jack, LAN port
- 40 W x 2 amplifier (16 cm x 5 cm) x 2 speaker system (6 5/16" x 1 15/16") x 2 speaker system
- Music clips + 120 preset songs (Song Book)

Feature descriptions in red text indicate that those are more extensive than similar ones of the next model down (CVP-501).
Experience realistic instrument Voices such as guitars and saxophone with an easy to read display and an elegant design.

CVP-505PE
Polished Ebony

Real Voices reproduce the performance methods unique to each musical instrument

Super Articulation Voice

LCD clearly displays all settings, sheet music and lyrics

Large Color LCD Display

Features a beautiful piano-like form all the way to the back of the cabinet

Exterior Design
The CVP-505 is equipped with **Super Articulation Voices** that let you reproduce sounds like fingers sliding across guitar strings or the breath sound of a saxophone player, according to how you play the keys. These Voices add tremendous realism to your performance, especially when played using one of the built-in Styles. The easy to read, color LCD provides clear information and quick access to all of the functions. Featuring the **GH3 (Graded Hammer 3) keyboard** with **synthetic ivory keytops** and **Pure CF Sound Engine**, the CVP-505 provides outstanding piano-like touch and tone. The body design and finish give the piano a light, attractive appearance.

**Voices reproduce true sound effects, just as if you are playing that actual musical instrument.**

**Super Articulation Voice** reproduces the sounds of many musical instruments and even the sound effects unique to those instruments, such as the strumming of a six-string guitar and the blowing of a sax or trumpet. Tonal nuances will thus differ completely if the strength of touch or playing technique such as legato or staccato are changed, even with the same voice or with the same melody. You can enjoy emotion-filled expression, just as if you are playing a real musical instrument.

Tri-Amp System
Rich string resonances occur when the damper pedal of a grand piano is pressed. Others are heard when the piano is played on a stage. These types of resonances are provided by the advanced acoustic processing of instrumental Active Field Control (iAFC), giving your performance the remarkably realistic sense of space acoustics of a grand piano. Whether your floors are carpeted or hard-wood, your room is large or small, iAFC makes automatic adjustments to best match the characteristics of the room you are playing in.

iAFC produces the deep resonances necessary for achieving breathtaking performances.

Feature descriptions in red text indicate that these are more extensive than similar ones of the next model down (CVP-505).
With its large cover, beautiful curves and other styling accents, the CVP-409GP has a grand piano-like presence that will take your breath away. Its NW (Natural Wood) keyboard is finished with synthetic ivory keytops for an outstanding tactile touch response. Equipped with functions such as iAFC that produces deep and wide reverberations, it creates a grand piano-playing atmosphere. It also comes with many other unique CVP Series features.

**Main Features**
- 88-key NW (Natural Wood) keyboard with synthetic ivory keytops (wood is used for the white keys)
- Key-Off samples and String Resonance
- Stereo Sustain samples
- 128 (piano) + 128 (accompaniment)-note polyphony

The strong point of the CGP-1000 is its external design, which steals your heart at a glance. Boasting features like those of other models in the CVP Series, its elegant appearance is that of a grand piano. Additionally as you play, the operating panel can be concealed so you feel like you are playing a grand piano. Its performance capabilities rival those of an acoustic piano in all aspects. The NW (Natural Wood) keyboard with synthetic ivory keytops prevent your fingers from slipping and it has a soundboard just like that of a grand piano. Yamaha’s exclusive iAFC feature ensures that deep, rich, resonant sounds will fill your room.
Expand The Possibilities For Your Clavinova With Yamaha Online Services!

Play

Play Along With Styles

Find the perfect accompaniment for an original song, a cover, or for improvisation and practice. Yamaha Premium Style Files are designed to the exacting standards of the factory-installed Styles in your instrument. With Yamaha Style Files, you’ll sound like you have a professional backing band behind you.

Play Along With Songs

■ with the perfect setup for your keyboard

Trying to set up your Clavinova to play a particular song? Song “Records” can make your performances sound better than ever. Each Record will set up your Clavinova with the perfect Voice and Style to play an authentic rendition of a popular song. Just visit the URL below to download and install the Music Finder Standard Library, and instantly update your Clavinova with over 1,000 new Records!

http://services.music.yamaha.com/musicfinder
Thousands more are available from the Music Finder+ section of the Internet Direct Connection service, directly through your Clavinova!

■ with performance assistance

No matter what song you’re playing, it’s easy to sound great with your Yamaha Clavinova. Yamaha MIDI songs work with the learning features of your Clavinova to make it easy and fun to improve your playing. You can “follow the lights” and use the Tempo and Score functions of your Clavinova to learn at your own pace.

Learn

Take Lessons

A Yamaha instrument is a great learning tool, offering many new, exciting and easy ways to learn music. With a variety of lesson formats to choose from you can always find a method to suit your learning style. The Passport to Music service offers a set of basic exercises for beginners, and will have you playing your first song in no time!

Listen

Listen To Radio

Great for entertaining or just relaxing at home! Get 24-hour access to over 20 different channels of high quality piano music that play directly through your instrument for a unique listening experience.

Listen To Songs

Open up your ears to a new way to listen to music - classic, professional interpretations of the world’s greatest songs, played with the famous Yamaha sound live on your piano. With Yamaha PianoSoft collections, you can listen to your favorite songs whenever you want!
Visit us at services.music.yamaha.com and see just how far you can expand your musical horizons!

**Yamaha Online Services**

- **Model:** CVP-503 / CVP-503PE
- **Width:** 39.3" (100 cm)
- **Depth:** 23.1" (60 cm)
- **Height:** 41.9" (106 cm)

#### Specifications
- **Display:** 640 x 480 dots TFT VGA
- **Input:** USB
- **Microphone:** Internal
- **Input Devices:** USB
- **Output Devices:** USB

#### Dimensions
- **(W x D x H):** (56 3/8" x 24 3/16" x 41 1/16"")

#### Weight
- **88.3 kg (194 lbs., 15 oz)**

---

### CVP-501
- **Type:** Digital Piano
- **Model:** CVP-501 / CVP-501GP
- **Width:** 39.1" (100 cm)
- **Depth:** 23.1" (60 cm)
- **Height:** 41.9" (106 cm)

#### Specifications
- **Display:** 640 x 480 dots TFT VGA
- **Input:** USB
- **Microphone:** Internal
- **Input Devices:** USB
- **Output Devices:** USB

#### Dimensions
- **(W x D x H):** (56 3/8" x 24 3/16" x 41 1/16"")

#### Weight
- **88.3 kg (194 lbs., 15 oz)**

---

### Additional Information
- **NW = Natural Wood (wood is used for the white keys)**
- **GH3 = Graded Hammer 3**
- **GH = Graded Hammer**
- **Availability of optional accessories varies by area.**
- **Specifications are subject to change without notice.**
- **The cabinet and finishing colors in this brochure may differ from those on the actual products.**
Yamaha’s Environmental Efforts

Yamaha Corp. and Yamaha Motor Co., Ltd. are utilizing planted trees in Indonesia under a five year plan called The Yamaha Forest that began in 2005. The second phase of this activity will continue for five years from 2010. The Yamaha Forest is an effort that contributes to regional society through environmental conservation based on planted forests and support for education in Indonesia, where the two companies have production and sales centers.

Headquarters and all factories have obtained environmental management ISO 14001 certification, and are conducting continuous environmental conservation activities.
